

## Company Update

### **Altai's Smart Warehouse Solution for Jollibee in Philippines**

Originating from the Philippines, Jollibee is one of the world's largest fast-food restaurant chains. Altai has recently deployed its Super WiFi products in their warehouses to further enhance their inventory system.

For the 7,200 sqm area of Jollibee's cold storage warehouse which is separated into 8 rooms, only 23 units of Altai's A2e have been deployed. Nonetheless, they are able to provide a stable and robust network coverage for the whole warehouse area.

Jollibee was totally satisfied with the quick deployment and the high quality of the wireless connection. The warehouse's daily operation has been greatly improved by the stable network connection brought by Altai.

## Altai Connects Handhelds for Pepsi

Altai has installed its equipment in a deployment for Pepsi's bottling factory in Vietnam. Altai's devices are now supporting Pepsi's bottling machines and its handhelds to produce beverages every day.

In the factory's three areas with a total area of 300 sqm, one A2 is sufficient to cover each area respectively. Even though the factory is covered with bottling machines which are blocking WiFi signals, the performance of Altai's APs is not affected at all.

Altai's products have greatly improved the factory's operational efficiency. Pepsi is amazed by the result brought by Altai and is now in discussion to deploy more devices in other factories in the near future.

## Product News

### AltaiCare Upgraded to R2.2.0

Altai has just upgraded its cloud-based AltaiCare WiFi Management platform. Along with customers' welcoming reaction to AltaiCare since its launch in 2015, Altai has been improving its system to better suit customers' needs. The new version will be equipped with several new functions. Here are the major highlights:

- Guest WiFi voucher system
- Full portal login support (Guest Login, Social Account Login, Sign Up and Username/Password)
- Layer 2 portal support (AP no longer need to be network gateway)
- Introduction of organization tier for project account/credit management
- White label credit support
- RSSI reporting feature support for third party location engine integration

## Altai's New AP Firmware R2.2

- Firewall
- SNMPv3
- Client OS Detection
- Passpoint R2 certified
- Promiscuous Mode support for Tcpdump
- Dynamic VLAN
- 802.11w (Protected Management Frame)
- 802.11k (Radio Resource Management)
- 802.11v (BSS Transition Management)

## Company Events

### Altai at Chittagong IT Fair 2019 in Bangladesh

Altai participated in one of the most anticipated IT events in Bangladesh, Chittagong IT Fair 2019, with its Bangladesh partner, Integra, from 26 – 29 Jan 2019 in Chittagong. Altai's showcase raised a lot of attention at the event, while Integra's representatives introduced Altai's technologies and latest products to the visitors. Many partners and visitors from different parts of the world visited Altai's booth to understand the newest Super WiFi technologies and solutions. They are amazed by the fact Altai Super WiFi can cover a distance up to 1.7km with only one single base station.

## Altai at Industrial Expo in India

Industrial Expo was the 8th industrial trade fair held in Ankleshwar of Gujarat State where the attendees would find the full range of technical innovations from automation to supplier solutions. Altai participated in this event to showcase the latest Super WiFi solutions deployed in various industrial segments such as ports, mining, oil & gas, logistics and warehouse. The coverage and cost-effectiveness of Altai's products have impressed all of the visitors.
