

Overview

Nothing is more critical than a robust and stable network for a high-tech company. Clicklabs Inc is a software development company has branches all over the world and headquarter in the United States; its branch in India has recently deployed a 100% indoor wireless network adopting Altai Super WiFi solution.

The office building of Clicklabs in India has 5 stories occupying 5,000 square feet each. There are 800 employees in total working in this 5-level office sharing the same network while each of them is using data-hungry 5Ghz Mac devices and iPhones for program development purpose. Clicklabs had previously deployed a network using products of a competitor of Altai's. The solution required 48 access points with an outcome unsatisfying. Clicklabs was then recommended Altai Super WiFi by Altai's distributor in India, JNS. Being assured the performance and advantages by JNS, Clicklabs decided to choose Altai for the new network deployment. Altai's solution deployed 18 APs (15 units of A2c, 1 unit of A3-Ei, 2 units of A3w and AltaiCare) which is only 1/3 of the number used by its competitors.

Altai's solution has not only saved cost for Clicklabs, the network performance has also surpassed Clicklabs' expectation with its signal strength and robustness.

Customer Name:

Clicklabs Inc
JNS Systech Pvt Ltd (Distributor)

Deployment Location:

Chandigarh, India

Application:

WiFi network for staff and programmers'

Products used:

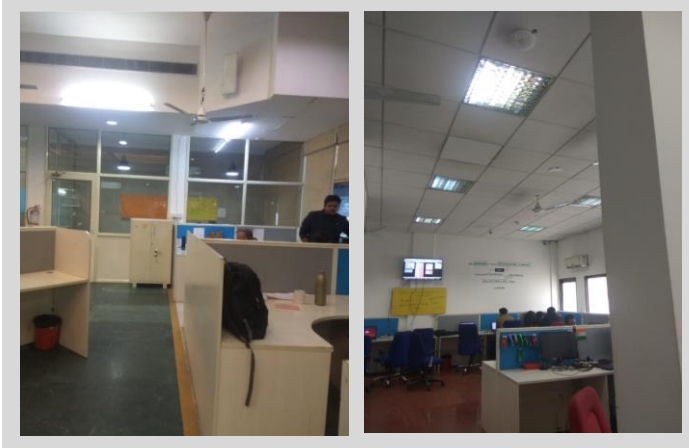

A2c, A3-Ei, A3w, AltaiCare

Result:

15 units of A2c, 1 unit of A3-Ei, 2 units of A3w and the AltaiCare controller have been installed in the office area to provide a 100% indoor coverage. Clicklabs was totally satisfied by the fact that Altai's network can remain robust and stable although 800+ data demanding devices are sharing it.

The Challenge

- 800+ data demanding devices sharing the network
- Large area indoor coverage

The Solution

15 units of A2c, 1 unit of A3-Ei, 2 units of A3w and the AltaiCare controller have been installed in the office area to provide a 100% indoor coverage.

The Result

Altai's products have provided a reliable network for all the staff and programmers to work and utilize their professionals. Even there are 800 mac devices sharing the wireless network, the network remains stable and robust. Clicklabs was totally amazed by the fact that Altai was able to deliver a satisfying outcome with a much smaller number of devices comparing with Altai's competitor.

About Altai

Altai Technologies is a leading supplier of carrier-grade Wi-Fi products and technologies with a distribution network reaching 100 countries. Altai Super WiFi is the leading solution for vertical industrial markets, covering over 200 terminal ports and airports globally.

The Altai Super WiFi Solution includes a complete portfolio of indoor and outdoor products for carriers, WISPs, and enterprises to support a wide range of applications such as mobile data off load, public access, WLAN access, and backhaul.

Utilizing patented smart antenna technology, as well as a cloud-based management system called AltaiCare, the Altai Super WiFi Solution is designed from the ground up to deliver WiFi networks that have unprecedented performance, reliability, scalability, and manageability.
