Altai Deploys for Municipality in Turkey

Esenyurt is a district of the Istanbul Province and is a part of the metropolitan municipality of Istanbul. With the high concentration of population, the demand for public Wi-Fi is high. Recognizing the need by the municipality, a public WiFi project has been carried out by adopting Altai Super WiFi solution for its outstanding performance in providing large area coverage for both in/outdoor environments.

Altai's high-performance dual band indoor AP, A3c, has been selected in this project, which can fit in with flexible mounting options. The APs have been deployed at public libraries and cultural centres. With superior RF performance and coverage, only 1 unit of A3c is sufficient to provide full coverage for each facility, some of these facilities accommodate up to 200 simultaneous users.

Altai Launches Deal Registration Program

Altai Technologies would like to announce the launch of deal registration program. Following the rapid development of Altai's business all over the world, Altai has been

working with many partners in different countries. In order to protect and recognize a partner's efforts in working and closing a specific deal, Altai has decided to implement a deal registration mechanism. Under the program, Altai's authorized partners can register a project with an estimated

size more than USD5,000. Upon approval, the project will be locked for the registered partner and direct sales support will be offered by Altai.

You may now register your project with Altai and find more details of the program at this link: https://docs.google.com/forms/d/e/1FAIpQLSe6XQIkMu0s1mQ3VVS-y03bwthcxCWRgdus5HUsqU7D09Je_A/viewform?usp=pp_url

Northern African Wireless Features Altai's Deployment for Coca-Cola

In the recent issue of Northern African Wireless Communications, a free online magazine reporting news on African telecommunication industry for readers in east, west, central and northern Africa, Altai's deployment for the Coca-Cola warehouse in Egypt has been highlighted.

The major challenges of this project were the large area that the warehouses occupying and the structure of the buildings. Fortunately, Altai's advanced smart antenna technology offers the solution to overcome these challenges and the network performance has completely surpassed the end user's expectations.

New Wi-Fi solution gives Coca-Cola Egypt extra fizz

The Coca-Cola Company needs little or no introduction, but if you didn't know, it's a beverage retailer, manufacturer and marketer of non-alcoholic beverage concentrates and syrups. The company's flagship product is Coca-Cola, but it offers more than 500 brands in over 200 countries or territories and serves 1.6bn servings each day. The Coca-Cola Company is headquartered in Atlanta, Georgia. Its stock is listed on the New York Stock Exchange (NYSE). As Egypt is one of the global markets Coca-Cola Bottling Company has huge investments

where their warehouses are distributed all over the country. The challenge was to cover the entire warehouses yards all over the country in order to provide reliable Wi-Fi connectivity for the staff for daily operation. Owing to the size of the warehouses and the structure of the buildings, the existing wireless network provided very limited coverage. NextGen Communications, our partner in Egypt replaced the network using Altai Super Wi-Fi Solution to provide 100% outdoor coverage. The staff can now access the company system with their handheld devices anytime, anywhere. The daily operation of the staff has increased greatly by their ability to access the company system smoothly and efficiently. ■
