

## Company Update

### **Altai Connects Another Rural Village to the World by Super WiFi**

For more than 75 years, the people of Batu Rotok Village, Sumbawa, West Nusa Tenggara of Indonesia have lived in isolation. The villagers have been suffering due to poor infrastructure and lack of access to communicate with the world. The Covid-19 pandemic has even worsened their situation. Fortunately, the Indonesia Government has noticed their difficulties and introduced Altai Super WiFi solution.

With the patented smart antenna technology, a single Altai Super WiFi base station can cover as much as 2km<sup>2</sup>. This advantage has dramatically reduced the number of AP needed and made the deployment process simpler in rural area where suitable sites are limited for installing APs. With the infrastructure in place, the villagers can from now on have online meetings and schools can conduct online classes. Altai Super WiFi solution has brought internet access to

the remote village and connected them to the world !

### Altai Brings Wi-Fi to Hospital in Niger

Altai has recently won a project to deploy a wireless network for Hôpital de référence de Maradi (Maradi Referral Hospital) in the capital of Niger. With a capacity of 500 beds, the hospital has state-of-the-art equipment for the care of patients except ophthalmology.

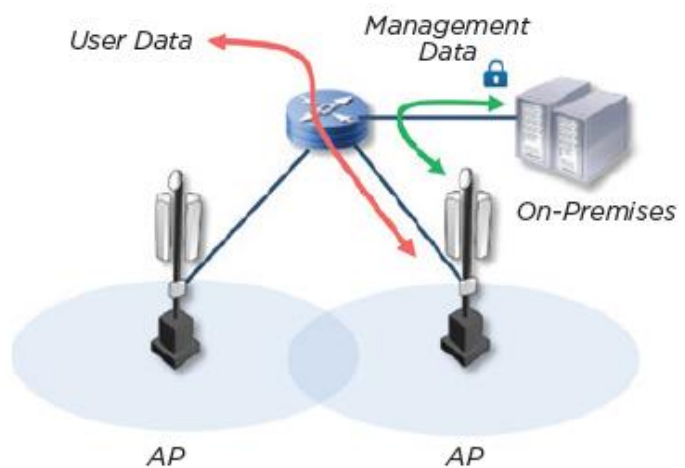

Recognising Altai's reputation on large area coverage and outstanding RF performance, the Maradi Referral Hospital management team has selected Altai Super WiFi solution for their wireless network that can match with the service quality of the hospital. In order to meet the challenging

demand of the hospital in terms of capacity and number of concurrent users, Altai has proposed to use A3-Ei for outdoor coverage, CX200 for gap-filling, IX500 for indoor area and AltaiGate for access management.

## Product Update

### AltaiCare On Premises 4.0

AltaiCare, Altai's cloud-based network management solution, has been well-received by the customers since its launch. AltaiCare On-Premises, developed based upon the AltaiCare cloud-based platform, is the local version of AltaiCare which can be hosted on a local server. The latest AltaiCare On-Premises software version 4.0 has recently been released and below are the highlighted features:

- Support VMware as a new VM platform (vSphere ESXi, Workstation Pro and Workstation Player)

- Revamp UI design
  - Introduce new license activation methods (Internet-based license server and local license manager)
  - Support self-service password reset (forgot password)
  - Support rogue AP detection
  - Add wireless topology view and link status monitoring
  - Support AP gateway mode for management
  - Support batch AP configuration
  - Provide a single pane view of station association for a whole site
- .....and many more minor updates and enhancements
