Altai Lights Up World's Largest Underground Industrial Complex

Wi-Fi Now, an organization dedicated to support and promote all things Wi-Fi, has conducted an exclusive interview with Mike Bell, the Senior VP of Hunt Midwest, which is the developer of SubTropolis near Kansas City, Missouri. SubTropolis is a gigantic underground industrial & business park that has recently deployed Altai Super WiFi solution. The challenging underground condition had long been problematic for building a reliable wireless communication in a cost-effective manner. Fortunately, Altai Super WiFi Solution was brought to the underground complex by Krysp Wireless, Altai's distributor in the US.

Being able to cover a much larger area than any of its competitors, Altai has made the

impossible possible! Apart from lighting up roadways in SubTropolis, Altai Super WiFi Solution has also ensured underground communications with Police or Fire department in a safety perspective, and not to mention allowing the underground roadways to be mapped and tracked on Google Map.

While achieving all of these miracles, Altai Super WiFi Solution only costs a fraction of the total project cost with other vendors in the market. "With the Super WiFi products that Krysp Wireless brought to us, the money we spent on a test to light up 2 miles of road way in SubTropolis, costed one-tenth of what was going to cost us three years ago. It is truly transformational," said Mike Bell in the interview with Wi-Fi Now.

Bell expressed that he is expecting to extend the Wi-Fi coverage to 75% roadways of the underground complex in next year. To conclude the experience with Altai Super WiFi, Bell remarked, "I would highly recommend this Altai Super WiFi system; it's godsend for us."

Super WiFi Solution Shines in India Warehousing Show

India Warehousing Show was first launched in 2011 and has evolved into a glorified platform for warehousing and logistics industry. Over the years, the annual exhibition has been a converging point for thousands of exhibitors showcasing a wide range of innovative products, solutions, technologies, market trends and value-added services.

This year, Altai's distributor in India, JNS System, presented Altai Super WiFi Solution in the event and showcased how its patented technology is able to convert your warehouse to an automated one with

quick deployment and relatively lower cost. Altai's booth has successfully attracted large number of visitors and the countless success stories of Super WiFi deployed in warehouses and logistics centres have raised the visitors' awareness of the importance and benefits of wireless network in logistics industries.
