

## Company Update

### **Côte d'Ivoire Terminal Adopts Altai Super WiFi**

Côte d'Ivoire Terminal (CIT), Abidjan's second container terminal located adjacent to the existing Abidjan Terminal, is a project jointly developed by two leading container port operators, Bolloré Ports and APM Terminals. The construction of CIT has begun in October 2020 and is scheduled to be operational in November 2022. Having invested 400 million euro, the terminal is expected to play a significant role in the country's import/export trade and to serve as a preferred gateway for neighbouring countries. To match with the high expectations, the terminal operators equip CIT with facilities in the highest standards and they have selected Altai Super WiFi for their wireless access infrastructure.

Having the unique smart antenna technology, a single Altai Super WiFi base station is able to cover a much larger area than any standard Wi-Fi AP in the market. For its impeccable technologies and outstanding RF performance, Altai's Super WiFi solution has already been adopted by more than 200

container ports by now.

### Connecting Rural Malaysia with Super WiFi

To improve the people's lives by following the pace of digital transformation, the Malaysian government has initiated the National Digital Infrastructure Plan (JENDELA) to realize the aspiration of a digital nation. Among all the goals, expansion of Internet access, especially in rural areas, is the major focus of the project. For this purpose, the Malaysian Communications and Multimedia Commission (MCMC) has been rolling out satellite broadband access services for 839 remote locations by adopting Altai Super Wi-Fi to enable long

range Wi-Fi coverage.

The coverage of Altai Super Wi-Fi signal is much larger than the footprint of any standard access points, therefore meeting the expectation for rural Wi-Fi network. With much smaller number of access points but better RF signal coverage at a lesser cost, Altai's patented smart antenna technology brings internet access to the farthest corner of Malaysia.

### Altai's New Partner in Central Asia

Altai is excited to announce that we have signed up with a new partner, Alatel, for the region of Central Asia, covering Kazakhstan, Uzbekistan, Kyrgyzstan, Turkmenistan, Tajikistan, Georgia and Moldova. Alatel is an IT company based in Almaty of Kazakhstan and has already been working on certain projects with Altai Super WiFi solutions, more details to be disclosed later.
