Altai Collaborates with Check Point to Deliver Flexible IoT Protection

Check Point Software Technologies is a world leading provider of cyber security solutions to corporate enterprises and governments globally. Check Point Infinity's portfolio of solutions protects enterprises and public organizations from 5th generation cyber-attacks with an industry leading catch rate of malware, ransomware, and other threats. Altai Super WiFi is

now working with Check Point to integrate its security solution in AltaiGate to offer a single box solution to customers who are looking for comprehensively secured and cost-effective network management.

At Check Point Secure 2022 seminar held earlier this month in Hong Kong, Altai's Vice President of Business Development, Mr Ken Leung, was invited as a guest panel speaker to share how their solution could help customers protect their networks and systems. The event was a great success with many inquiries received by both companies.

New Partner in Colombia Joins Altai's Global Distribution Network

A new Colombian-based distributor has joined forces with Altai to provide high quality end-to-end telecommunications solutions through the concept of smart logistics. Since its establishment, Kubos Tecnologia has been offering telecommunication services for three main types of customers: fixed and wireless ISPs, value-added system integrators and industrial market. Prior to the partnership with Altai, Kubos Tecnologia has already been working on large scale projects to provide wireless access network for warehouses in the whole Colombian territory. From now on, the Colombian distributor is ready to deliver the best in class wireless access solution, Altai Super WiFi, to every corner of the country.

Solar-Powered Super WiFi Network for Mejillones Port in Chile

Altai is now working with its partner in Chile, Redit, to deploy its Super WiFi solution at Puerto Angamos, which is a significant port located in Mejillones of Antofagasta Region, the centre of Chilean mining region. Its privileged location is close to the most important copper district in the world and is also on the doorstep of important commercial areas, such as Salta in Argentina and Asuncion in Paraguay.

Altai Super WiFi was introduced to the privileged port by Redit. Puerto Angamos put trust in Altai based on their track record of successful deployments in over 200 container ports around the globe. With the patented smart antenna technology, a single Altai base station can cover a large area with outstanding RF performance that standard Wi-Fi AP cannot surpass. Altai's flagship base station A8n, A3-Ei and A2 have already been deployed in the port. Some of the APs are installed on moving carts and supported by solar power, allowing those APs to move around the port.
