

Company Update

Altai to Enable Sustainable Solutions

Altai's Chilean partner, Redit, has recently been awarded a project to deploy a wireless network for CMPC, one of the largest pulp and paper companies globally. The Chile-based company is mainly engaged in integrated forest industry, including forestry, production of pulp, paper, paper products and tissue. CMPC is also part of international alliances contributing to the sustainability of the planet, with 90% of the company's own forest assets are certified under sustainable forest management.

In the upcoming project with Redit, Altai's products will be used to set up a communication network in one of their exploitation area in the Araucanía region where no cellular network is available. Altai's products will be used jointly with Starlink products to form a network allowing forest officials to have real time

communications and security applications such as sensors, alarms and geolocation among others.

Company Events

Altai Shows Off Its Super WiFi Technology in Las Vegas

Altai has participated in the four-day annual event, WISPAPALOOZA, at The Paris Hotel in

Las Vegas this year. WISPAPALOOZA is one of the most important gatherings in the ISP industry allowing participants to network with other professionals and learn about new technology that is shaping today's ISP trend. This time Altai has joined the event with its distributor in the United States, EPCOM, to showcase its outstanding smart antenna technology. Altai's Regional Business Development Director, Mr Javier Mochnacs, was present at the event to

introduce the flagship A8-Ein Super WiFi base station and other popular products including A2, A3-Ei, CX200 and C1xn+ to the visitors.

Altai Impresses Audience with Impeccable Wi-Fi Technology on Demo Day 2022

Altai was invited to present on The HKSTP Acceleration Programme Demo Day 2022. The event was successfully held on 20 Oct by showcasing the most outstanding startups and companies which can demonstrate the growing strength of Hong Kong's R&D ecosystem. Apart from displaying their development and products, certain well-performed companies including Altai were also invited to share their solutions and successful cases on stage. In that evening, Altai's Vice President of Business Development, Mr Ken Leung, represented Altai to introduce its patented smart antenna technology and showcase how it enables automation globally. The presentation has impressed the audience with Altai's impeccable technologies and proven track record. Altai's booth was surrounded by visitors with interest and enquiries after the sharing.
