

Company Update

Automating Steel Production in Turkey

Being among the largest steel producers worldwide, Erdemir now has 4 million tons of crude steel capacity, and 5 million tons of final products capacity. Erdemir has been adding value to the Turkish and global economy since 1965 and continuing with its investments in order to meet the ever-increasing demand, improve production and to constantly keep up with the most recent technological developments. Therefore, they chose Altai Super WiFi to upgrade their factory network system. Having experience in automating many manufacturing plants over the world, Altai's Super WiFi solution is well known for its RF robustness and reliability in harsh environment of industrial plants. In this project, Altai will work with its partner in Turkey, Aircom, to deploy the flagship A8n WiFi base station and CX200 at the steel producer's factory.

Company Events

ExpolSP 2022 Powered by Altai Super WiFi

ExpolSP 2022 has been successfully held on 26 – 28 October this year in Santa Marta of Colombia. The event was firstly organized in 2017, and it has become one of the most

important meetings for the Colombian telecommunications and technology industry, being the benchmark meeting place for all internet service providers, in a cordial and friendly atmosphere. During the event, Altai's Colombian partner, Kubos, did not only display Altai's products at their stand, but also provided Wi-Fi network coverage for the entire expo venue allowing all participants to enjoy free internet access. The promotion allowed

the visitors to learn about Altai's brand by experiencing the robustness and reliability of the network powered by Altai Super WiFi solution.

Training for WISP in Mexico

Altai's LATAM team has conducted a training for SYSCOM's customers on 26 – 27 Oct at their headquarters in Chihuahua City. SYSCOM is Altai's long-term distributor for Mexico. The company is a leading global distributor of telecommunications and security solution. They have 15 distribution centers strategically located in the United States and Mexico, as well as important allies for distribution in Central and South America. The training sessions held in Oct was specially designed for WISPs allowing them to

understand Altai's Super WiFi solution and the winning edges including smart antenna technology and the impeccable RF performance resulting in long-range coverage.

Upcoming Event
