Modernization of Wireless Connectivity in the Buenaventura Regional Port Society (SPRBUN)

Altai's Colombian partner, INSITEL. S.A, has recently implemented a project that was carried out to modernize the wireless infrastructure of Buenaventura Port in Colombia with Altai Super WiFi solution. Buenaventura, with the meaning of good fortune in English, is the main port of Colombia in the Pacific Ocean. This project was designed with the purpose of obtaining stable connectivity and 100% coverage of the Wi-Fi network throughout the port, thus guaranteeing that all equipment, devices, cranes, among others, achieve an optimal connection, achieving a notable improvement in the environment and also the optimization of processes.

Super WiFi Covers UK Shopping & Leisure Parks

Partnering with Inkspotwifi for over 5 years, Altai and the venue Wi-Fi provider have been working together to provide the best quality of high-performance Wi-Fi network by

deploying Altai Super WiFi solution in different indoor and outdoor scenarios across UK including shopping centres, retail parks, holiday parks and town centres. Altai Super WiFi has been adopted by the nation's largest property management, the Crown Estate, due to the patented technology and reliable RF performance that boost Altai's products up to 10 times the coverage and 5 times the capacity over any standard AP. The technical

advantage makes Altai solution ideal for large area coverage with high data and users demand.

Altai Contributes to Accelerate Construction Development in HK

Altai has joined the ConTech Accelerator programme to create a more innovative, safer and stronger construction environment. ConTech Accelerator is a programme jointly launched by the Hong Kong Construction Industry Council (CIC) and the Hong Kong Science & Technology Parks Corporation (HKSTP) to accelerate technology trials and adoption across the construction industry. Through the programme, the participated construction companies show strong interest on Altai's unique technology and intention of cooperation. The

patented smart antenna technology allows a single Altai Super WiFi base station to be able to cover an area much larger than any standard Wi-Fi AP to save cost and cabling efforts. The IP67 rating also makes Altai's product especially suitable for challenging environments in construction.
